

Frequently Asked Questions (FAQs): Construction Best Management Practices (BMP) Handbook

Why was the CASQA Construction BMP Handbook revised in 2024?

Periodically, CASQA refines the handbook to provide additional resources and updated information. The 2024 Construction BMP Handbook supports implementation of the 2022 Construction General Permit ([2022 CGP](#)). The 2022 CGP was reissued by the State Water Resources Control Board on September 8, 2022 and became effective on September 1, 2023.

When will the 2024 Construction BMP Handbook be needed?

The [2024 Construction BMP Handbook](#) will be needed starting on September 1, 2023 for all construction projects subject to the [2022 CGP](#).

What revisions were completed in the 2024 Construction BMP Handbook?

The 2024 Construction BMP Handbook revisions include:

New Content:

- Fact Sheets in Spanish (Appendix F)
- SE-15 Passive Treatment Fact Sheet (in English and Spanish)

Updated Fact Sheets:

- SE-5 Fiber Rolls
- SE-13 Compost Socks and Berms
- NS-2 Dewatering Operations

Minor Updates to:

- All Fact Sheets
- Handbook
- Traditional SWPPP Template (Appendix C)
- Linear Underground Projects/LUPs SWPP Template (Appendix D)

I have a current subscription to the Construction BMP Handbook. How do I access the updated 2024 version?

Current subscribers have immediate access to the 2024 Construction BMP Handbook (as well as continued access to the 2019 Construction BMP Handbook). Make sure you are logged in to your CASQA account and [click here](#).

I do not have a subscription to the Construction BMP Handbook. How do I access it?

Both the 2024 and 2019 Construction BMP Handbooks are available through an annual subscription. To purchase a new subscription, [click here](#).

Why are there two versions of the Construction BMP Handbook available to subscribers?

The 2022 CGP includes a transition period, resulting in some projects continuing coverage under the [2009 CGP](#) and other projects requiring coverage under the [2022 CGP](#). To support all construction projects, CASQA is providing two versions of the Construction BMP Handbooks to subscribers.

2024 Construction BMP Handbook

All construction projects initiated after September 1, 2023 will require coverage under the 2022 CGP. This handbook supports implementation of the 2022 CGP.

2019 Construction BMP Handbook

All construction projects with the Waste Discharge ID (WDID) numbers issued before September 1, 2023 may continue construction activities under the [2009 CGP](#) (with some exceptions that require compliance with the 2022 CGP – see [below](#) for more details). This handbook supports implementation of the 2009 CGP. It will be available to support these projects until August 31, 2025 (when the 2009 CGP will cease to be applicable to all construction activities).

What about construction projects subject to the 2009 CGP? What Construction BMP Handbook should I use?

All construction projects with the Waste Discharge ID (WDID) numbers issued before September 1, 2023 may continue construction activities under the [2009 CGP](#), with some exceptions (see [below](#)). Projects subject to the 2009 CGP should use the 2019 Construction BMP Handbook as it contains guidance and templates applicable to the 2009 permit requirements.

Why would a project with a WDID number issued before September 1, 2023 need to comply with the 2022 CGP? What Construction BMP Handbook should I use?

There are some exceptions where a project or a portion of the project with a WDID number issued before September 1, 2023 would need to comply with the [2022 CGP](#) (and not the [2009 CGP](#)). The exceptions noted here are for general guidance purposes only. **It is the responsibility of the permittee to consult with the [California Water Boards](#) to ensure all projects comply with the applicable permit, based on the considerations for each individual project.**

Projects with WDID numbers issued before September 1, 2023 may need to comply with the [2022 CGP](#) if:

- The project's disturbed acreage increases on or after September 1, 2023. The new area will be regulated under the [2022 CGP](#).
- The project's Small Construction Rainfall Erosivity Waiver needs modification.
- The project is not completed by August 31, 2025. The Water Board will administratively terminate coverage under the [2009 CGP](#) and the permittee will be required to obtain coverage under the [2022 CGP](#) by September 1, 2025 to continue construction activities.

If these exceptions apply to your project, and you have confirmed that your project is subject to the [2022 CGP](#), you should use the 2024 Construction BMP Handbook as it contains the appropriate guidance and templates.

My project was initiated before September 1, 2023 but I elected coverage under the 2022 CGP. Which Construction BMP Handbook should I use?

Projects that have elected coverage under the [2022 CGP](#) should use the 2024 Construction BMP Handbook. To learn more about how to elect coverage under the 2022 CGP, contact [California Water Boards](#).

How long will the 2019 Construction BMP Handbook be available online?

The 2019 Construction BMP Handbook, which assists with implementation of the [2009 CGP](#), will be available to subscribers until August 31, 2025. After September 1, 2025, the 2019 Construction BMP Handbook will be no longer available on the CASQA website as it will no longer be necessary or applicable to any construction projects within California.

How do I Access the Construction BMP Handbooks (2024 and 2019 versions)?

Both handbooks are available through the same subscription. Current subscribers have immediate access to both versions. If you have a lapsed subscription or need to purchase a new subscription, [click here](#) or scan the QR code.
